## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 4/28/2005 and 2/25/2004 are acknowledged. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner considers the references cited therein.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 21-26, 28-33, and 35-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Sachse ('435).
4. Sachse inherently discloses a method for accessing a site within a body, comprising: inserting a elongate member (16) into a first lumen of a cannula (1,2,3), detachably attaching the distal end of the first elongate member to the cannula, steering a distal end of the cannula to a desired site, detaching the distal end of the elongate member from the cannula, and delivering a diagnostic element through the first lumen to the access site. (See Column 2 Lines 10-65 and Figure 2) Sachse further discloses a configuration with a second lumen for delivering a contrast medium. (See Figure 1)

Art Unit: 3763

5. It appears that Sachse reasonably teaches every element of claims 21-26, 28-33, and 35-37.

***Allowable Subject Matter***

6. Claims 27 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
